

PROPETAL 150

Low foaming surfactant

Chemical Composition

Fatty alcohol polyalkylene glycol ether

Appearance: colourless to yellow liquid
Ionic character: nonionic

Typical data

Active ingredient: 100 %
Cloud point (1 % in dist. water): 48 to 52 °C
pH value (10 %): 6
Solubility: soluble in water, ethanol and isopropanol

Application

PROPETAL 150 is a low foaming surfactant and stable in acid and alkaline pH ranges. It is compatible with hard water and with anionic, cationic or amphoteric surfactants.

PROPETAL 150 is used in household and industrial cleansers, particularly in the higher temperature range of 50 to 80 °C.

Storage

Propetal 150 may become turbid, particularly at lower temperature. The turbidity can be removed by careful heating to approx. 50 °C without loss in quality. The product is hygroscopic and must be stored under dry conditions. Open containers must be closed after usage.

The above results have been obtained from trials in our laboratory and plant. In the light of changing conditions they can serve only as a guide and are therefore offered without obligation. We ask you to observe the possible rights of third parties.
